**COMMITTED TO PROVIDING
THE HIGHEST QUALITY
ABRASIVE PRODUCTS.**

OUR COMMITMENT TO OUR CUSTOMERS IS SET IN STONE.

About Us

For nearly forty years BORIDE Engineered Abrasives has developed and manufactured abrasive products for industrial and consumer applications. Through our global network of suppliers and industry experts we distribute products that our customers need to improve their quality and productivity.

Our entire organization serves our worldwide customers and distributors with:

- Consistent, high-quality products
- On-time, error-free shipments
- Prompt, accurate information and answers

Precise process management, fact-based problem solving and extensive material science are important parts of our foundation. Our quality management system is based on ISO9001:2008. Both our Quality Policy and Core Values steer the company's operation.

Our dedication, skill and attitude is obvious. Every day our employees are working hard on improving our organization and all of our employees play a vital role in doing it better. It all starts with you; our customers, distributors and suppliers. Tell us what you need and we will do our best to accommodate your request.

Quality Policy

“Our customers are our reason for being.” Our customers define product and service quality requirements. We listen to our customers, strive to understand their needs and meet their expectations with:

- Quality products consisting of bonded abrasive articles and related products for metal and ceramic finishing and grinding applications
- Extraordinary customer service
- Competitive pricing
- Technological leadership

“Employees are key to business success.” We will encourage and support our employees to actively participate in the success of our business by:

- Providing a safe workplace
- Providing an environment of trust and respect
- Communicating thoroughly about our business
- Providing training to increase knowledge and skill

“Everything is done with a process.” We will document, plan, control, monitor and audit our processes as a foundation for continuous improvement. We will measure our performance based on quality, safety, service, and manufacturing effectiveness and efficiency.

TABLE OF CONTENTS

EDM Polishing Stones	1	AM-8 Excellent ultrasonic stone, strong, holds shape
	2	AS-9 Great for profiler and hand stoning
	3	Orange EDM Fast cutting action with consistent breakdown
	4	Golden Star Offers superior breakdown characteristics and a smooth, silky finish
General Purpose Stones (Aluminum Oxide)	5	AM-2 General purpose stone, soft, fast breakdown
	6	Die Stone Slightly harder than AM-2
	7	AM-K White aluminum oxide stone good for machined surfaces
	8	AS-H White aluminum oxide stone softer than AM-K
General Purpose Stones (Silicon Carbide)	9	CS Fast-cutting black silicon carbide
	10	CS-M Premium green silicon carbide, fast-cutting, medium hardness
	11	CS-HD Harder stone than CS-M, excellent for hardened steel, 47-63Rc
Specialty Stones	12	RASP Our most versatile all around finishing stone
	13	PC Premium polishing stone for final finish work
	14	T2 Excellent stone for stainless steel
	15	T4 Engineered for finishing aluminum and soft metals
	16	A0 Aggressive stone for general mill removal and EDM
	17	TH Performs well on all types of tool steels
	18	900-F Very soft stone for super-fine finishing
Roughing Stones	19	Ruby Extremely fast cutting stone
	19	Roughout Softer stone, aggressive cutting, 80–220 grits
	19	RO-GS Soft aluminum oxide, excellent for large tools and dies
	19	RO-Med Medium-hard aluminum oxide, excellent for mold contours
	19	RO-Hard Hard aluminum oxide, excellent for detailing sharp corners
Sharpening Stones	20-21	Sharpening Stones Used for deburring, sharpening and honing

EDM Polishing Stones (Aluminum Oxide)

AM-8

The AM-8 is designed for removing EDM scale on all types of mold and die steel. Additionally, it is an excellent tool for polishing sharp corners and small details either by hand or with the use of polishing machines.

Golden Star

Made from select premium aluminum oxide grain and a proprietary treatment process, the Golden Star is of medium hardness with a fast breakdown offering quick material removal while contouring quickly and leaving a silky smooth finish. The Golden Star works on all tool steels and performs exceptionally on EDM surfaces, milling and machining marks. This stone does not require a lengthy pre-lubrication process and is terrific when used during hand stoning as well as with profilers.

General Purpose Stones (Aluminum Oxide)

AM-2

The AM-2 is an excellent all around finishing stone engineered for hand polishing all types of mold and die steels, including SAE 1030 pre-heat treated P-20, H-13, S-7 and T-420. Soft action combined with perfect breakdown also permits pre-finishing on non-ferrous metals such as aluminum, beryllium, kirksite and high chrome/nickel stainless steel.

General Purpose Stones (Aluminum Oxide)

AM-K

The AM-K is a white aluminum oxide stone of medium hardness that performs well on all types of mold steel. Generally, it is used dry for rough forming and removal of machine marks. Lubricants are used for finer grits. Some polishers use the 400 and 600 grits for finishing plastic molds and blow molds.

General Purpose Stones (Silicon Carbide)

CS

The CS is a fast cutting, black silicon carbide stone. It is a soft stone designed to conform rapidly to a variety of details and is mostly used for hand polishing. It breaks down rapidly. CS stones are used on all tool steels, as well as for roughing out some non-ferrous materials.

General Purpose Stones (Silicon Carbide)

CS-HD

Compared to the CS or CS-M, the CS-HD is harder acting and slower to break down. It can be used to polish even the hardest die and mold steels. Polishers claim excellent results when finishing dies ranging in hardness from 47 to 63Rc. Some mold makers also use the CS-HD for removal of EDM.

T2

This specialty treated medium-hard aluminum oxide stone cuts very fast and yet provides a silky, smooth finish. Even the most selective polishing 'pro' will like the T2 for high quality mold steel such as P-20, H-13, and 420 stainless.

Specialty Stones (Aluminum Oxide)

T4

The T4 is a specially treated medium aluminum oxide stone that cuts fast and leaves an excellent finish. The T4 is similar to the T2 but breaks down faster. It works very well on aluminum, not scratching or tearing the surface.

AO

The AO offers excellent breakdown characteristics and yet retains its shape well, especially when polishing mold cavity details. Because the AO is filled with lubricant during the manufacturing process, it does not require lengthy pre-lubrication. 220 grit is an ideal "start up stone" for machined surfaces. Grits 220 and 320 work well in removing EDM scale.

Specialty Stones (Aluminum Oxide)

TH

The TH is made from premium grade aluminum oxide, then specially treated to provide a load resistant, smooth cutting action. The TH holds its shape and is an excellent stone choice for EDM surfaces. It performs well on all types of tool steels.

900-F

This stone has super-fine structure and excellent breakdown properties for final finishing prior to mirror (diamond polishing) finishing. The 900-F works especially well on P-20 mold steel with a hardness ranging from 29 to 32Rc.

Swing Luster SLS 16

LS11380

Pencil type polisher suited for narrow grooves, and details. Compact design and minimal vibration keep hands fatigue free for continuous operation. Grindstone holder provided, tools such as oil stone, Super Stone, Cristone®, diamond files, etc. can be used. Stroke: 0–9,000 times/min. Stroke range variable: 0–1.6 mm.

NLS 110 Profiler (Built in Motor)

1483

Powerful reciprocating stroke polisher equipped with 1/4 Speed Reducer to multiply the torque by 4 times. The tilt angle is adjustable and the grinding surface can be set at any angle between 0 and 360 degrees enabling grinding of all sides of the surface without moving the profiler itself. Rubber grip absorbs vibration, reducing fatigue. Stroke: 0–7,600 times/min. Fully adjustable. Various standard attachment tools included.

Luster LS 100 Profiler

LS10815

The Luster LS-100 is a powerful reciprocating stroke polisher that is used with electric motor attachments such as the ENK-410S or ENK-250T. The tilt angle is adjustable and the grinding surface can be set at any angle between 0 and 360 degrees enabling grinding of all sides of the surface without moving the profiler itself. Rubber grip absorbs vibration, reducing fatigue. Stroke: 0–7,600 times/min. Fully adjustable. Various standard attachment tools included.

Cristone® Crystal Fiber Stones

Cristone® Crystal Fiber Stones are made from using the highest quality, chemically produced crystal fibers. The crystalline structure of the crystal fibers offers high polishing efficiency and incredible bending strength. These are the perfect stones for detail polishing.

DIAMAX Diamond Compound

DIAMAX is BORIDE's premium brand of diamond compound and the leading choice for all polishing applications. It is formulated for a broad range of mold and die finishing work offering faster cut rates and better surface finishes than other brands. It also offers excellent surface tension and adhesion to tool surfaces. The precise blend of natural diamond's unsurpassed cutting capability and manufactured diamond's toughness and extended durability (more natural diamond than synthetic) results in superior finishing. DIAMAX is a medium-heavy concentration that is both water and oil soluble.

Mold Makers Diamond

Mold Makers Diamond is our most versatile yet cost effective diamond compound. It is very well known in the industry as it was specially engineered for precision finishing for all types of mold and die applications. Consistent particle distribution and a wide thermal processing range allow it to be used under the most demanding conditions. It is the most versatile diamond compound that we offer due to the number of grades and concentrations available. Mold Makers Diamond consists of a combination of synthetic and natural diamond particles resulting in an aggressive yet cost effective product. Unique 5 and 18 gram syringes are dial controlled offering precise distribution. Available in either oil-based or water-based formulations and medium, heavy and extra heavy concentrations.

*Also available in 2 gram syringes.

Wood Sticks & Diamond Foil

Our wood sticks are made of select balsa (very soft) and white birch (soft). Very soft sticks are used for final finishing with diamond or other compounds. The soft sticks are used for intermediate to final finishing with diamond or other compounds.

Our diamond foil is of the highest quality and offers aggressive cutting action in a wide range of grit sizes. The foil is applied to a flexible, adhesive backing and can be cut to size.

Wood Sticks

Wide selection of wood sticks for lapping and finishing by hand or with reciprocating and rotary tools. Softer wood creates a higher surface finish while the harder sticks cut fast and hold shape longer.

Cratex® Small Wheels

Cratex® Rubberized Abrasives are made with oil-resistant chemical rubber. In contrast to conventional grinding wheels, the Cratex® bond has unique cushioned action. It cuts freely, smoothly and softly without gouging or digging into the work surface. It resists clogging or smearing, and is ideal for a broad range of applications where metallic or non metallic surfaces must be smoothed and polished without loss of dimensional tolerances or control. 100 pieces per package.

Also available in money saving kits.

Cratex® Large Wheels

Cratex® Rubberized Abrasives are made with oil-resistant chemical rubber. In contrast to conventional grinding wheels, the Cratex® bond has unique cushioned action. It cuts freely, smoothly and softly without gouging or digging into the work surface. It resists clogging or smearing, and is ideal for a broad range of applications where metallic or non metallic surfaces must be smoothed and polished without loss of dimensional tolerances or control. Sold individually.

SUNBURST® Radial Discs

No matter what the material being worked, SUNBURST® Radial Discs are the absolute best for finishing and polishing hard-to-access areas without removing detail or causing flat spots. The sharp, clean, specially treated aluminum oxide abrasive grain embedded throughout their elastomer binder enable them to work faster and last longer than rubber wheels, brushes, buffs and conventional abrasives. SUNBURST® Radial Discs generate minimal dust and heat and eliminate the need for polishing compound.

Custom sizes for unique applications are available by request.

Belt Sticks

Versatile and economical for a wide variety of applications including mold finishing, metal finishing, woodworking, welding clean up, pattern making, gun repair and much more. They feature three working areas: a flat bottom, round end and a tapered end for intricate areas. Its spring-loaded tensioning device allows the abrasive belt to be quickly changed and/or rotated so that all areas of the belt can be used. The ergonomic shape of the Belt Stick adds comfort and the thumb and finger supports add control. Supplied in five colors to quickly distinguish one grit from another.

Megabrite Mounted Points

Megabrite Mounted Points are the optimal mounted points for light deburring, cleaning, finishing and polishing of precision machine and cast parts. They conform to the shape of a part, leave a smooth finish, maintain part geometry and are easy to dress to fit profiles and hard to reach areas. For use on stainless steel, aluminum and exotic metals.

All with 1/8" mandrel. 10 pieces per package.
 Other shapes, sizes and grits available upon request.

Premium Purple Mounted Points

Premium Purple Mounted Points are manufactured with Premium Pink fused aluminum oxide grain combined with unique Sol Gel ceramic grain for an extremely long lasting, but cool cutting mounted point. Double the life of a standard mounted point in most cases, the Premium Purple can be used on all ferrous & non-ferrous materials. They offer less loading and cooler running lessening the possibility of thermal damage during polishing. Other shapes and sizes available upon request.

All with 1/8" mandrel. 25 pieces per package.

BORI-LUBE 10 Polishing Lubricant

L10G - GALLON
L10P - PINT

BORI-LUBE 10 is formulated for mold polishing to clean, lubricate and prevent stone loading. Environmentally friendly and non-hazardous, BORI-LUBE 10 Polishing Lubricant is available in gallon and pint size containers.

Premium Stoning Oil

336050 - 2 OZ BOTTLE
336040 - PINT
336030 - GALLON

Premium Stoning Oil is an ideal lubricant to use with all of our mold and die polishing stones and coated abrasives. Prevents stone loading and allows for more consistent and free cutting action.

Mold Polish

332000

Unique to the industry, our mold polish is offered in a 20 gram controlled syringe to allow precise application without the fear of contamination. BORIDE mold polish is odor and residue free, non-hazardous, and non-corrosive. It will remove rust, oxidation, diamond polish haze, plate out and stains on fine tooling surfaces.

Simichrome Polish

332002 – 50 GM TUBE
332003 – 250 GM TIN

Simichrome Polish removes tarnish, dirt and oils, and generally renews polished metal surfaces while leaving a protective film which retards oxidation. Simichrome works well on brass, bronze, chromium, and aluminum and is recommended for use after diamond compound. It can be rubbed on and removed with a soft cloth; or it can be used with a clean felt bob.

OptiVISOR Light Kit 380140

An LED lighting system designed specifically for the OptiVISOR. The OptiVISOR Light Kit consists of six LED bulbs with over 100,000 hour life expectancies which have been specifically chosen to give you the best possible LED lighting solution available based on intensity, radiant pattern, color temperature, and battery life. It reduces shadows and increases visibility in any environment lighting up holes, ribs and cavities. 2 – AA batteries are included.

OptiLOUPE 380180

The OptiLOUPE is an attachable lens that adds the additional power of an eye loupe to the OptiVISOR. It is designed for monocular use attaching to either eye of any OptiVISOR and easily flips up or down providing additional 2.5 times magnification.

Comfort Headband 380181

Genuine leather comfort band designed specifically for the OptiVISOR. Padded orthopedic felt adds to comfort. Easy to replace. Shown installed on the standard OptiVISOR Headband.

VisorLIGHT 10" Cord: 380182 42" Cord: 380183 Replacement Bulb : 380184

The VisorLIGHT is a unique hands-free lightweight battery-powered light that illuminates a magnified viewing area and attaches to the top of the OptiVISOR. Two models are available to allow complete mounting: a 10" short cord for mounting on a headband and a 42" long cord so the battery pack can be worn on a belt or placed in a pocket. Swivels up and down for optimal light coverage, Xenon laser beam bulb (brighter than LEDs), 6000 candle power, 4-5 hours battery life (if used continuously), operates on two AA batteries which are not included.

LED Illuminating Headband Magnifier 380190

Designed to be worn by professionals and craftsman whose tasks require close, accurate work, these magnifier visors leave both hands free and allow three dimensional vision. Product features include a detachable LED light source, 11 different magnifications, handy storage box, single-plate lens: 1.0X, 1.5X, 2.0X, 2.5X, 3.5X and Bi-plate lens: 3.0X, 4.0X, 4.5X, 5.0X, 5.5X, 6.0X.
